PROFILE

I am student at Hyper Island. My journey started with buildings and how to make them, shifted to making interior spaces awesome, and eventually led me to UX/UI design, which I absolutely love. Designing cool and user-friendly stuff isn't just a job, it's my passion. I enjoy working in teams, learning from others, and always aim to upgrade my skills with each project. The mix of creativity and technology gets me excited, and I'm eager to contribute my skills to create awesome experiences in future projects.
